Mechanism, Dosing & Physiology

1. Hamdy S, Aziz Q, Rothwell JC, et al. The cortical topography of human swallowing musculature in health and disease. *Nat Med*. 1996;2(11):1217-1224. doi:10.1038/nm1196-1217
2. Hamdy S, Aziz Q, Rothwell JC, et al. Explaining oropharyngeal dysphagia after unilateral hemispheric stroke. *Lancet*. 1997;350(9079):686-692. doi:10.1016/S0140-6736(97)02068-0
3. Hamdy S, Aziz Q, Rothwell JC, et al. Recovery of swallowing after dysphagic stroke relates to functional reorganization in the intact motor cortex. *Gastroenterology*. 1998;115(5):1104-1112. doi:10.1016/s0016-5085(98)70081-2
4. Hamdy S, Rothwell JC, Aziz Q, Singh KD, Thompson DG. Long-term reorganization of human motor cortex driven by short-term sensory stimulation. *Nat Neurosci*. 1998;1(1):64-68. doi:10.1038/264
5. Fraser C, Power M, Hamdy S, et al. Driving plasticity in human adult motor cortex is associated with improved motor function after brain injury. *Neuron*. 2002;34(5):831-840. doi:10.1016/S0896-6273(02)00705-5
6. Suntrup S, Teismann I, Wollbrink A, et al. Pharyngeal electrical stimulation can modulate swallowing in cortical processing and behavior - magnetoencephalographic evidence. *Neuroimage*. 2015;104:117-124. doi:10.1016/j.neuroimage.2014.10.016
7. Suntrup-Krueger S, Bittner S, Recker S, et al. Electrical pharyngeal stimulation increases substance P level in saliva. *Neurogastroenterol Motil*. 2016;28(6):855-860. doi:10.1111/nmo.12783
8. Muhle P, Labeit B, Wollbrink A, et al. Targeting the sensory feedback within the swallowing network-Reversing artificially induced pharyngolaryngeal hypesthesia by central and peripheral stimulation strategies. *Hum Brain Mapp*. 2021;42(2):427-438. doi:10.1002/hbm.25233
9. Everaert M, Hamdy S, Goeleven A, Tack J, Vanuytsel T, Rommel N. Pharyngeal electrical stimulation favorably modifies healthy human pharyngoesophageal function: a randomized trial using high-resolution manometry impedance. *J Appl Physiol* (1985). 2025;138(4):988-1001. doi:10.1152/japplphysiol.00516.2024
10. Cheng I, Jung A, Labeit B, et al. Metaplasticity in swallowing system via cross-modal neurostimulation: a randomized crossover trial with magnetoencephalography. *Neurotherapeutics*. 2026;23(1):e00835. doi:10.1016/j.neurot.2026.e00835

Stroke: Non-ventilated

11. Jayasekeran V, Singh S, Tyrrell P, et al. Adjunctive functional pharyngeal electrical stimulation reverses swallowing disability after brain lesions. *Gastroenterology*. 2010;138(5):1737-1746. doi:10.1053/j.gastro.2010.01.052
12. Michou E, Mistry S, Jefferson S, et al. Characterizing the mechanisms of central and peripheral forms of neurostimulation in chronic dysphagic stroke patients. *Brain Stimul*. 2014;7(1):66-73. doi:10.1016/j.brs.2013.09.005
13. Youssef G, El-Banna M. The outcome of intraluminal electrical pharyngeal stimulation (EPS) on oropharyngeal dysphagia in acute stroke patients. *Al-Azhar Assiut Med J*. 2015;13(1):68-72
14. Bath PM, Scutt P, Love J, et al. Pharyngeal electrical stimulation for treatment of dysphagia in subacute stroke: a randomized controlled trial. *Stroke*. 2016;47(6):1562-1570. doi:10.1161/STROKEAHA.115.012455
15. Vasant DH, Michou E, O'Leary N, et al. Pharyngeal electrical stimulation in dysphagia poststroke: a prospective, randomized single-blinded interventional study. *Neurorehabil Neural Repair*. 2016;30(9):866-875. doi:10.1177/1545968316639129
16. Harvey RL, Smith R, Bathula R, et al. Pharyngeal electrical stimulation to treat dysphagia in acute stroke: learnings from cases in the PhEED clinical trial. *J Rehabil Med*. 2025;57:jrm43538. doi:10.2340/jrm.v57.43538
17. Hinkelmann F, Kaspari M, Wojtecki L. Pharyngeal electrical stimulation for the treatment of dysphagia in Wallenberg syndrome: A FEES-based case analysis. *eNeurologicalSci*. 2026;44:100619. Published 2026 Aug 3. doi:10.1016/j.ensci.2026.100619

Stroke: Intubated / Post Extubation / Tracheostomized

18. Suntrup S, Marian T, Schröder JB, et al. Electrical pharyngeal stimulation for dysphagia treatment in tracheotomized stroke patients: a randomized controlled trial. *Intensive Care Med*. 2015;41(9):1629-1637. doi:10.1007/s00134-015-3897-8
19. Muhle P, Suntrup-Krueger S, Bittner S, et al. Increase of substance P concentration in saliva after pharyngeal electrical stimulation in severely dysphagic stroke patients: an indicator of decannulation success? *Neurosignals*. 2017;25(1):74-87. doi:10.1159/000482002
20. Dziewas R, Stellato R, van der Tweel I, et al. Pharyngeal electrical stimulation for early decannulation in tracheotomised patients with neurogenic dysphagia after stroke (PHAST-TRAC): a prospective, single-blinded, randomised trial. *Lancet Neurol*. 2018;17(10):849-859. doi:10.1016/S1474-4422(18)30255-2
21. Florea C, Bräumann C, Mussger C, et al. Therapy of dysphagia by prolonged pharyngeal electrical stimulation (Phagenyx) in a patient with brainstem infarction. *Brain Sci*. 2020;10(5):256. doi:10.3390/brainsci10050256
22. Suntrup-Krueger S, Labeit B, Marian T, et al. Pharyngeal electrical stimulation for postextubation dysphagia in acute stroke: a randomized controlled pilot trial. *Crit Care*. 2023;27(1):383. doi:10.1186/s13054-023-04665-6
23. Muhle P, Claus I, Labeit B, et al. Pharyngeal electrical stimulation prior to extubation-Reduction of extubation failure rate in acute stroke patients? *J Crit Care*. 2024;82:154808. doi:10.1016/j.jcrc.2024.154808
24. Suntrup-Krueger S, Labeit B, von Itter J, et al. Treating postextubation dysphagia after stroke with pharyngeal electrical stimulation-insights from a randomized controlled pilot trial. *Neurotherapeutics*. Published online May 17, 2025. doi:10.1016/j.neurot.2025.e00613
25. Labeit B, Jung A, von Itter J, et al. Pharyngeal electrical stimulation for postextubation dysphagia after stroke: a randomized trial on hospitalization costs from a health insurance perspective. *Sci Rep*. 2026;16(1):8556. doi:10.1038/s41598-026-43591-9

FDA De Novo grant · Mechanistic / physiological · Randomized study · Nonrandomized interventional / observational · Case report / series · Health Economics and Outcomes Research · Systematic review / meta-analysis · Guideline · Narrative review / perspective

These studies cover indications for use not cleared by US FDA

Mixed Etiology (including Traumatic Brain Injury)

26. Bath PM, Woodhouse LJ, Suntrup-Krueger S, et al. Pharyngeal electrical stimulation for neurogenic dysphagia following stroke, traumatic brain injury or other causes: main results from the PHADER cohort study. *EClinicalMedicine*. 2020;28:100608. doi:10.1016/j.eclinm.2020.100608

Critical Care / ICU (Non-Stroke)

27. Köstenberger M, Neuwersch S, Hoefner E, et al. A pilot study of pharyngeal electrical stimulation for orally intubated ICU patients with dysphagia. *Neurocrit Care*. 2020;32(2):532-538. doi:10.1007/s12028-019-00780-x
28. Traugott M, Hoepler W, Kitzberger R, et al. Successful treatment of intubation-induced severe neurogenic post-extubation dysphagia using pharyngeal electrical stimulation in a COVID-19 survivor: a case report. *J Med Case Rep*. 2021;15(1):148. doi:10.1186/s13256-021-02763-z
29 Blakemore C, Hunter J, Basu B. Rapid swallow improvement following pharyngeal electrical stimulation in a COVID-19 patient with long-term severe neurogenic dysphagia: a case report. *JRM Clin Commun*. 2021;4:jrmcc00075. doi:10.2340/20030711-1000073
30. Traugott MT, Hoepler W, Kelani H, Schatzl M, Friese E, Neuhold S. Pharyngeal electrical stimulation treatment of critically ill intensive care tracheostomized patients presenting with severe neurogenic dysphagia: a case series. *Austin J Pulm Respir Med*. 2022;9(1):1088
31. Williams T, Walkden E, Patel K, Cochrane NE, McGrath BA, Wallace S. Research report: Management of dysphagia using pharyngeal electrical stimulation in the general intensive care population - A service development. *J Intensive Care Soc*. 2024;25(4):374-382. Published 2024 Aug 19. doi:10.1177/17511437241270244

Other Neurologic Conditions

32. Restivo DA, Casabona A, Centonze D, Marchese-Ragona R, Maimone D, Pavone A. Pharyngeal electrical stimulation for dysphagia associated with multiple sclerosis: a pilot study. *Brain Stimul*. 2013;6(3):418-423. doi:10.1016/j.brs.2012.09.001
33. Beirer S, Grisold W, Dreisbach J. Therapy-resistant dysphagia successfully treated using pharyngeal electrical stimulation in a patient with the pharyngeal-cervical-brachial variant of the Guillain-Barré syndrome. *eNeurologicalSci*. 2020;20:100255. doi:10.1016/j.ensci.2020.100255
34. Herrmann C, Schradt F, Lindner-Pfleghar B, Schuster J, Ludolph AC, Dorst J. Pharyngeal electrical stimulation in amyotrophic lateral sclerosis: a pilot study. *Ther Adv Neurol Disord*. 2022;15:17562864211068394. doi:10.1177/17562864211068394

Systematic Reviews & Meta-Analyses

35. Scutt P, Lee HS, Hamdy S, Bath PM. Pharyngeal electrical stimulation for treatment of poststroke dysphagia: individual patient data meta-analysis of randomised controlled trials. *Stroke Res Treat*. 2015;2015:429053. doi:10.1155/2015/429053
36. Cheng I, Sasegbon A, Hamdy S. Effects of neurostimulation on poststroke dysphagia: a synthesis of current evidence from randomized controlled trials. *Neuromodulation*. 2021;24(8):1388-1401. doi:10.1111/ner.13327
37. Liu Z, Cheng J, Tan C, Liu H, Han D. Pharyngeal cavity electrical stimulation-assisted swallowing for post-stroke dysphagia: a systematic review and meta-analysis of randomized controlled studies. *Dysphagia*. 2024;39(4):541-551. doi:10.1007/s00455-023-10644-4
38. Dai M, Cheng I, Sasegbon A, Li W, Hamdy S. A meta-analysis and systematic review of the effects of sensory modulation treatments for neurogenic oropharyngeal dysphagia. *CNS Neurosci Ther*. 2025;31(7):e70452. doi:10.1111/cns.70452

Guidelines

39. McGrath BA, Wallace S, Bonvento B, Lynch J, Coe B, Atkinson D. Guidance for Tracheostomy Care. *Intensive Care Society*; 2020.
40. Dziewas R, Allescher HD, Aroyo I, et al. Diagnosis and treatment of neurogenic dysphagia: S1 guideline of the German Society of Neurology. *Neurol Res Pract*. 2021;3:23. doi:10.1186/s42466-021-00122-3
41. Dziewas R, Michou E, Trapl-Grundschober M, et al. European Stroke Organisation and European Society for Swallowing Disorders guideline for the diagnosis and treatment of post-stroke dysphagia. *Eur Stroke J*. 2021;6(3):LXXXIX-CXV. doi:10.1177/23969873211039721
42. Prabhakaran S, Gonzalez NR, Zachrison KS, et al. 2026 Guideline for the Early Management of Patients With Acute Ischemic Stroke: A Guideline From the American Heart Association/American Stroke Association. *Stroke*. 2026;57(8):e316-e436. doi:10.1161/STR.0000000000000513
43. Richards LG, Ifejika NL, Stein J, et al. 2026 Guideline for Adult Stroke Rehabilitation and Recovery: A Guideline From the American Heart Association and American Stroke Association. *Stroke*. 2026;57(10):e514-e658. doi:10.1161/STR.0000000000000536

Predictors of Response

44. Essa H, Vasant DH, Raginis-Zborowska A, Payton A, Michou E, Hamdy S. The BDNF polymorphism Val66Met may be predictive of swallowing improvement post pharyngeal electrical stimulation in dysphagic stroke patients. *Neurogastroenterol Motil*. 2017;29(8):e13062. doi:10.1111/nmo.13062
45. Cheng I, Bath PM, Hamdy S, et al. Predictors of pharyngeal electrical stimulation treatment success in tracheotomised stroke patients with dysphagia: secondary analysis from PHADER cohort study. *Neurotherapeutics*. 2024;21(5):e00433. doi:10.1016/j.neurot.2024.e00433
46. Cheng I, Bath PM, Hamdy S, et al. Clinical predictors of outcome after pharyngeal electrical stimulation (PES) in non-stroke related neurogenic dysphagia after mechanical ventilation and tracheotomy: results from subgroup analysis of PHADER study. **Neurol Res Pract**. 2025;7(1):23. doi:10.1186/s42466-025-00380-5

Narrative Reviews

47. Frost N, Yuan G, Zhang J, et al. Speech language pathology in the neurocritical care unit. *Curr Treat Options Neurol*. 2023;25(11):499-516. doi:10.1007/s11940-023-00772-5
48. Sasegbon A, Cheng I, Labeit B, Lapa S, Rommel N, Hamdy S. New and evolving treatments for neurologic dysphagia. *Drugs*. 2024;84(8):909-932. doi:10.1007/s40265-024-02064-x
49. Sasegbon A, Cheng I, Dai M, Li W, Hamdy S. Device-based solutions supporting patients with swallowing problems. *Expert Rev Med Devices*. Published online May 25, 2025. doi:10.1080/17434440.2025.2508452

Expert Opinion
