

Waste Batteries Statement

As a producer of industrial batteries under the Waste Batteries and Accumulators Regulations 2009, we Phagenesis Limited produce Nickel Metal Hydride batteries that are integrated into our Phagenyx Base Stations. We are obliged to take back free of charge, waste industrial batteries supplied to an end user for treatment and recycling. We are required to do this in any calendar year we place new industrial batteries on the market. Our batteries cannot be removed from the Base Station by customers. If any of our customers no longer use the Base Station and require us to take back the units (incorporating the industrial batteries) they should contact us at info@phagenesis.com or by phone (44(0)161 8204525) and we will agree the necessary arrangements for the return, proper treatment and recycling of the Base Station units and waste industrial batteries.
